

**£6.50  
PER BAG**

# 100% RECYCLED HARDWOOD BRIQUETTES.

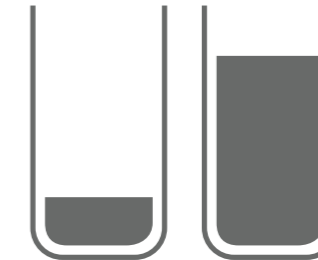

CLEAN, **GREEN**, COST EFFECTIVE

AT LEAST TWICE THE  
ENERGY COMPARED  
TO A BAG OF LOGS.

1m<sup>3</sup> briquettes weighs equivalent to approx 2m<sup>3</sup>  
(or 2 'dumpy' bags) of seasoned wood

Contains 5-8% moisture compared  
to 25%+ for seasoned wood

**SUITABLE FOR:**  
**MULTIFUEL STOVES,**  
**OPEN FIRES,**  
**CHIMENEAS**  
**& LOG BOILERS.**

#### THE PRODUCT

Manufactured from hardwood sawdust, a natural waste material sourced from joinery workshops around North Devon. The sawdust is compressed under enormous pressure allowing natural resins to bind it together forming a solid briquette ready for the fire, chimenea or stove.

#### WHY BUY IT?

It's Clean... In easy to handle sealed bags (on average, bags weigh 13.5kg and contain 95 briquettes). They are easy to store indoors and reduce the

amount of mess brought into the home. The efficient burn ensures lower ash waste and less chimney residues.

It's Green... These briquettes provide a carbon neutral heat source created from waste that would otherwise have been disposed of via landfill. This avoids the need to fell plantation timber purely for domestic heating use.

And above all, it's **cost effective**.

**TRY IT TODAY!**

- Easy to light
- Fast to heat
- High energy output
- Negligible waste or residue
- No unnatural additives
- Produced in North Devon
